PRESS RELEASE

**Incident of Radioactive Material discovered in
Scrap Dealers Shops in New Delhi**

This is in continuation to the earlier press releases issued by AERB on April 10, April 16 and April 29, 2010 regarding the recovery of radioactive material from the scrap metal market in Mayapuri, Delhi and its origin. The radioactive materials recovered from Delhi were transported, mid April 2010, to Narora Atomic Power Station (NAPS) for safe and secure storage and further inspection.

Detailed inspections of the materials recovered were carried out at NAPS site on May 3 and 4, 2010. During inspection the team has identified and accounted for all the radioactive sources originally present in the gamma cell of Delhi University. These sources will continue to remain in the safe custody of Department of Atomic Energy.
