

**Government of India  
Atomic Energy Regulatory Board  
Radiation Applications Safety Division**

**Date: February 23, 2026**

**Important Note:**

As per the provisions of Atomic Energy (Radiation Protection) Rules, 2004, availability of workers with appropriate training and instructions in radiation safety for obtaining a licence for operation of diagnostic X-ray equipment is mandatory. As diagnostic X-ray technologists are key professionals in diagnostic X-ray facility, AERB in the past had been assessing diagnostic X-ray technologists courses with respect to radiation safety.

As you may be aware, the Government of India has enacted the National Commission for Allied and Healthcare Professions Act, 2021, and has established a common regulatory body, namely the National Commission for Allied and Healthcare Professions (NCAHP), for regulation and standardization of the education and services of Allied and Healthcare Professions in the country. It is hereby informed that the assessment of diagnostic X-ray technologists courses with respect to radiation safety by AERB continued until recently even after the establishment of NCAHP, based on communications received from NCAHP.

However, based on the recent communication from NCAHP, the assessment of diagnostic X-ray technologists courses by AERB has now been discontinued. In view of the above, all institutes conducting diagnostic X-ray Technologists courses are advised to approach the Secretary, National Commission for Allied and Healthcare Professions (NCAHP), Ministry of Health & Family Welfare, AHS Section, Nirman Bhavan, New Delhi, regarding matters related to recognition of diagnostic X-ray technologists courses and any other related issues.
