

Regulatory Inspections of Operating NPPs

AERB carries out regulatory inspection of operating nuclear power plants under its regulatory purview to check compliance to regulatory requirements, and licensing conditions. These inspections provide a high level of assurance that licensed activities are conducted in accordance with regulatory requirements and in conformity with safety and security objectives.

Inspections are carried out periodically as well as in special circumstances. Generally, the inspections are carried out with prior announcement. AERB also carries out special unannounced inspections with specific objectives.

The following Tables provide plant specific information on inspections conducted by AERB during the calendar years 2022, 2021, 2020 and 2019.
